

## OBOutcome File Specification

| Field Name          | Field Definition   |
|---------------------|--|
| practice_id         | Practice ID  |
| create_timestamp    | Create date of the document OBG-DELIVE   |
| modify_timestamp    | Last modified date of OBG-DELIVE document  |
| ob_outcome_uuid     | UUID from OBG-DELIVE   |
| patient_mrn         | Patient MRN  |
| MEDENT_id           | Patient's MEDENT account number  |
| outcome_provider_id | Dr number from OBG-DELIVE document   |
| outcome_date        | Date of Delivery component from OBG-DELIVERY RECORD in document OBG-DELIVE   |
| ob_outcome          | Content of document components within OBG-DELIVE;<br>1. OB-PREG HX TYPE<br>2. If 1 is not found, OB-PREG HX BIRTH WEIGHT/GENDER GRAMS for 'miscarriage' or 'stillbirth' if pregnancy terminated with stillbirth or miscarriage |
| birthweight         | Content of component OB-PREG HX BIRTH WEIGHT/GENDER GRAMS in document OBG-DELIVE for numeric entry   |
| birthweight_units   | Content of component OB-PREG HX BIRTH WEIGHT/GENDER GRAMS in document OBG-DELIVE for "grams"   |

**Notes:** The OB outcome feed contains data on the outcomes of all pregnancies entered in the OB episode feed. The outcome feed is separate to allow for multiple outcomes to be entered per episode in the event of multiple births. When delivery results in multiple births, each birthweight will generate its own unique data feed. The ob\_outcome\_id will be the same except for a numeric character to indicate the delivery order of the birthweights.
