

Patient File Specification

Field Name	Field Description	Example Output
practice_id	Practice ID	1111
create_timestamp	Create date time of the patient	2023-10-24 08:12:00
modify_timestamp	Last modified date time	2023-10-24 08:12:00
patient_uuid	UUID in the patient status screen from the MEDENT UUID section	1120fc2d-a1f4-4287-a60f-12b8eaf3246c
patient_mrn	Patient MRN	MRN.1111.6f324cdb-c87b-4eff-b493-89a7e5b0fd70
MEDENT_ID	Patient's MEDENT account number	2071
provider_id	Provider number from Patient Info	1
rdr_id	Provider number from the Patient info for the RDr field. Provider ID begins with an R to indicate data is from the referring dr master files	R1
pcp_id	Provider number from the Patient info for the PCP field. Provider ID begins with an R to indicate data is from the referring dr master files	R1
location_id	Location number from Patient Info	1
optometrist	Optometrist from patient info	
resident	Resident from patient info	
first_name	Patient's first name from Patient Information Screen. Note: If there is something documented in the Extended Name fields, we will include that first.	Leslie
middle_name	Patient's middle name from Patient Information Screen. Note: If there is something documented in the Extended Name fields, we will include that first.	Smith
last_name	Patient's last name from Patient Information Screen. Note: If there is something documented in the Extended Name fields, we will include that first.	
prior_name	Prior name field in Patient Status screen	
sex	Patient's Sex at Birth field, if not documented in that field, data is captured from the Sex field in Patient Information	F
race_code	Loinc code from patient's Race field from Patient Information Screen This is the more general option of Black / African American, White, etc for example.	2054-5
race_desc	Description of Patient's Race field from Patient Information Screen	Black / African American

race2_code	Loinc code of Patient's Race field from Patient Information Screen This field is the more specific option of Dominican, for example. If multiple, they should be comma delimited.	2056-0
race2_desc	Description of Patient's Race field from Patient Information Screen	Black
ethnicity_code	Loinc code of Patient's Ethnicity from Patient Information Screen This is the more general option of Hispanic / Latino, for example.	2186-5
ethnicity_desc	Description of Patient's Ethnicity from Patient Information Screen	Not Hispanic Or Latino
ethnicity2_code	Loinc code of Patient's Ethnicity from Patient Information Screen This is the more specific option of Bolivian, for example. If multiple, they should be comma delimited.	
ethnicity2_desc	Description of Patient's Ethnicity from Patient Information Screen	
language_code	Code for the Language identified in the patient information screen	en
language	Patient's Language field from Patient Information Screen	English
email	Patient's Email field from Patient Info, only when a valid email is present	lsmith@example.com
address1	Line 1 of patient address from Patient Information Screen. Note: If there is something documented in the Extended Address fields, we will send that first.	204 Rapid Stream Islands
address2	Line 2 of patient address from Patient Information Screen Note: If there is something documented in the Extended Address fields, we will send that first.	Apt #23B
city	City of patient address from Patient Information Screen Note: If there is something documented in the Extended Address fields, we will send that first.	Port Johnnyville
state	Patient's State from the address in the Patient Information	RI
zip	Patient's zip code from the Patient Information Screen	02945
phone	Phone field from the Patient Information Screen	5628126890
phone_mobile	Mobile field from the Patient Information Screen	

birth_date	Patient's Date of Birth from the Patient Information Screen	2021-04-18
death_date	Patients Death Date from Patient Status Screen when patient status = deceased	
homelessness_status	Patient's homeless status from Population Characteristics if documented in Patient Status	Shelter
migrant_status	Patient's migrant worker status from Population Characteristics if documented in Patient Information	Migratory

public_housing_ind	Exports "1" if Public Housing checked in Population Characteristics in status screen, otherwise exports "0"	1
electronic_portal_access_date	Date of the last portal login on patient chart	
electronic_portal_status	Status based on portal icon on patient chart: Pending Activation, Active, Pending Reset, Frozen, Declined	Declined
electronic_portal_status_date	Date the status above took place	
sexual_orientation_code	SNOMED Code for the sexual orientation in the patient information screen, if available	20430005
sexual_orientation	Patient's sexual orientation description from Patient Information Screen if documented	Straight or heterosexual
gender_identity_code	SNOMED Code for the gender identity in the patient information screen, if available	446151000124109
gender_identity	Patient's gender identity from Patient Information Screen if documented	Male

edu_level_code	Education Level documents in the Social History section of the PFSH, under Education. Each option indicated includes a SNOMED. The SNOMED code populates this field.	224297003
edu_level_desc	Education Level documents in the Social History section of the PFSH, under Education. The description of the linked SNOMED code populates this field.	Educated to secondary school level
edu_level_text	Education Level documents in the Social History section of the PFSH, under Education. The description for the item selected populates this field (e.g. Currently Attending Grade 07TH)	Highest Level Completed 12TH Grade
employment_status	Patient's employment status from Patient Information Screen if documented	Part time
income	Household Annual Income from Patient Status screen	
period	"Annually" if there is income documented	
family_size	Household Family Size from Patient Status screen	
effective_date	Income Reviewed Date from Patient Status screen	
student_status	Student Status from the patient status screen (Full Time, Part Time, Not Student)	Not Student
marital_status	Marital Status	Widowed
pronouns	pronouns in Patient Info	He
mothers_maiden	Mother's maiden name	
prev_addr1	Previous address line 1	
prev_addr2	Previous address line 2	
prev_city	Previous address city	
prev_state	Previous address state	
prev_zip	Previous address zip code	
prev_addr_date	Previous address date range (01/01/2001-03/15/2014)	
birth_addr1	Address line 1 from Birth Location & Time in Patient Status	
birth_addr2	Address line 2 from Birth Location & Time in Patient Status	
birth_city	City from Birth Location & Time in Patient Status	
birth_state	State from Birth Location & Time in Patient Status	
birth_zip	Zip code from Birth Location & Time in Patient Status	

birth_country	Country from Birth Location & Time in Patient Status	
birth_time	Birth Time from Birth Location & Time in Patient Status	
multiple	Yes or No based on if the patient was born as a multiple birth in the Birth Location & Time in the Patient Status area	
multiple_birth_order	Content of Birth Order field in the Birth Location & Time in the Patient Status area	
prov_by_loc	If Provider by Location is set, this field should display the Location ID and provider ID for each documented in the patient info in the following format: LocID:ProviderID, LocID:ProviderID. Example: 1:1, 2:34, 5:16
